EXPERIENCE

[Go Launch Scall](#) — *Founder*

May 2024 - PRESENT

- Built and shipped full-stack SaaS products using Node.js, Express, Vue/Nuxt, PostgreSQL, REST APIs, Docker, Vercel.
- Built an idea validation platform with Node.js/PostgreSQL backend, structured interview workflows, evidence collection, scoring, and deterministic decision logic.
- Built a CRM with contacts, pipelines, stages, custom fields, tasks, notes, activity tracking, and outreach sequences.

PROJECTS

AI Agent Platform - work in progress

- Built a custom agent runtime with autonomous loops, tool calling, LLM interaction, artifacts, workspace context, and persistent knowledge.
- Designed reusable agent, tool, artifact, and workspace abstractions with Node.js and PostgreSQL.

[Reddit Lead Generation Automation](#)

- Built Reddit RSS → Supabase → Ollama scoring → lead analysis → dashboard pipeline.
- Implemented ingestion, background processing, LLM scoring, and scheduled execution with Node.js, PM2, and WSL.

EDUCATION

DCRUST, Murthal — *B Tech*

2017 - 2021

SKILLS

Fast Learner

Problem Solver

Independent Ownership

0→1 Product Development

Systems Thinking

TECH STACK

Frontend - Nuxt.js, Vue.js, Vite, Tailwind CSS, Axios

Backend - Node.js, Express.js, REST APIs,

Database - PostgreSQL, Supabase, MongoDB

AI & Agent System - OpenAI API, Ollama, Agent Loops, Tool Calling, Agent Memory, pgvector as vector db

Automation & Runtime - n8n, PM2, RSS Pipelines, Background Workers

Cloud & DevOps - AWS, Docker, Terraform, Git, GitHub, Linux, WSL2, Vercel, Railway
